

## Summary Builder

The summary should communicate who you are and what you can do for a company. An effective summary will drive the content of the rest of your resume and should always contain four key elements:

1. **Branding** - who you are professionally - your functional title and level
2. **Hard skills** - your specific areas of functional expertise
3. **Soft skills** - your strengths, experience and attributes
4. **Impact** - your overall impact/contribution

The following sample summaries capture these elements and are organized in various ways:

Senior **mechanical engineer** highly adept at driving production development efforts for existing products and new products. Extensive experience in precision manufacturing, aerospace and automotive industries. Skilled in variety of engineering environments and capacities from design of complete industrial vehicles, electro-mechanical components and testing of hydraulic systems.

- Design Engineering
- Project Management
- Product Development
- Quality Assurance
- Regulatory Compliance
- ISO 9000
- Vendor Management
- Customer Service
- Construction
